Video:

Can we also have an icon/image for the inventory.

What do you mean by access rights, please explain different types.

You Employee ID doesn't make any sense, it doesn't look like real data.

You didn't explain the sort feature?

You didn't show the working of your Print button.

I don't understand what you mean by TYPE, when entering data

Why balance is zero? What is balance?

Do the text boxes on the left in the Inventory screen let you delete/edit based on any field of the record. If yes, then you need to mention this in your video/design and development.

Can one sort or search based on a field in Inventory, it will be useful when the list gets longer.

Finish positively by thanks for watching the video/working of my program.
